RED EARTH HERBAL DROPS™

The Natural Alternative Since 1974™

(formerly medicine wheel)

The Red Earth Herbal Drops are products whose primary focus is to restore balance in the body through herbal supplementation. Through the medicinal herbal traditions of Native American healers, ancient Chinese & Ayurvedic medicine, Armenian herbal traditions, and modern herbal research our blended liquid extracts are formulated for optimum efficiency. Each blended liquid extract affects the body by supplying the nutrients that the physical system requires for natural healing. With over a quarter of a century of research and experience, the Red Earth Herbal Drops represent a unique synergistic development. Blending ancient herbal lore with modern techniques, our products combine the best quality herbs available.

Our liquid herbal products are blended and extracted according to modern traditional synergistic techniques. While each product has its own unique focus, the concepts of synergy, harmony, and balance is behind the preparation of each formula. Our unique product effectiveness is the result of careful selection of some of the earth's most powerful botanicals (primarily organic and wild-crafted) for enhanced therapeutic value. We ask you to join the many who have benefited from these powerful liquid extracts, by incorporating their healing benefits into your lives.¹

Why are Red Earth Herbal Drops the most efficient herbal medicine?

The fastest and most efficient method of allowing herbals to enter the bloodstream is with liquid tinctures & extracts. The Red Earth Herbals are liquid extracts, preserved in a grain alcohol base. The active herbal alkaloids are preserved and suspended in this extracted liquid. In this way, the herbals pass into the bloodstream easily, quickly, and efficiently. Herbal teas are also readily absorbed into the bloodstream since the herbal alkaloids are suspended within a liquid, though in less quantities. Tablets and capsules, however, are not assimilated in the stomach and intestines efficiently, often taking a greater amount of time to enter the bloodstream. This efficiency loss results when the herbal alkaloids contained in the powdered or solid form are not assimilated due to poor digestion and normal intestinal inefficiencies.

The herbal drops begin assimilation directly into body starting at the mouth and continuing throughout the gastrointestinal tract. The aqueous solution of grain alcohol and water in our herbal drops acts as a preserver for the suspended herbal alkaloids, thus maximizing the shelf life of the extract. Furthermore, because each dose is determined on the number of drops for a given weight, an individual can personally tailor the exact quantity needed.

NOTE: *If this small amount of alcohol is unacceptable, for any reason, put your Herbal Drops first into hot tea to evaporate the alcohol. If taste is your concern, put the drops into orange juice or another beverage. According to the average dose recommended for adults, the alcohol consumed is less than 3% of a glass of wine.*

What quality are your herbs?

Our liquid extracts use primarily pharmaceutical grade botanicals (mainly organically grown and ethically wild-crafted). A few highly uncommon herbs are selected from respected botanical importers. These are tested and inspected upon arrival at our facility to determine if they meet our high standards. Commercial grade herbs are **strictly avoided**. Commercial grade is machine-picked from large crops, sprayed, and dried in the sun without any consideration of freshness, potency, or when they are picked.

How are your liquid extracts made?

Through our synergistic process of grinding and blending, the herbal alkaloids are extracted in accordance with the moon's cycle through a cold extraction process. Other than the botanicals

themselves, only pure grain alcohol and distilled water are used. The alcohol is used as an edible and safe solvent for extracting the herbal alkaloids.

Additionally, the Red Earth Herbal Drops have an extended shelf life. All our extracts can maintain their potency and freshness for longer than 5 years when the bottles are unopened, and about one year after the bottles are opened.

Why are liquid herbal extracts so economical?

The cost of herbal tablets, capsules, and teas are comparable to herbal drops, when compared to their similar daily portions. The real economic margin is measured through the efficiency and higher effectiveness that our liquid extracts enjoy over other herbal forms. In this way, each dose of a Red Earth Herbal extract supplies the same or more herbal alkaloids directly into the bloodstream than multiple capsules or tablets.

Why are Red Earth Herbal Drops the easiest form of herbal?

There are various reasons to choose herbal extracts over other forms of medicine. Many people have trouble swallowing tablets and capsules, especially small children. Simply swallow the recommended dose or add them to your juice or water. Likewise, children can be administered the exact amount needed without any fuss. Based on their weight, even as little as a single drop for a young child can be administered. No tablet splitting or capsule emptying required.

Our formulations are conveniently contained in one-ounce amber (light-protected) bottles. Herbal drops are easy to carry in any pocket, purse, or carry-on for use at a moment's notice. Each bottle contains approximately 25 days supply.

How are Red Earth Herbal Drops used?

Herbal drops are usually taken 4 times per day. Some can be taken more or less frequently than stated on the label based on the individuals need (from 2 to 8 times per day). Our suggested dose is listed on each bottle for an average person weighing 120 to 150 lbs. (unless otherwise noted). For heavier or lighter adults, the dose should be adjusted proportionally. Children should receive $\frac{1}{4}$ to $\frac{1}{2}$ the suggested dose. We do not recommend giving herbal drops to babies.

Experience has also shown that when first starting a new herbal formula, a larger initial dose (15 to 20 drops) will boost its initial effectiveness. For chronic conditions, it will be necessary for the Red Earth Herbal Drops to be continued for a period of 60 days or longer.

Herbal drops can also be used for animal care (*the daily dosage must be in proportion to the weight of your pet or animal*). Put the adjusted daily dosage in the animal's water.

RED EARTH HERBAL DROP FORMULAS

Holistic studies indicate that no known product today has the ability, of itself, to perform any functional 'healing' of any organism. Healing agents set up the conditions conducive for an organism to heal itself. Our liquid extracts support the nutritional needs of specific systems, tissues, glands and organs to enhance the body's capacity for prevention and self-healing.

Our herbal formulations have names that are easily identifiable for particular therapeutic uses. All formulas, except *Cold Balm* and *Nature's Ear Oil*, contain distilled water and 35% grain alcohol by volume, along with a full disclosure of the botanicals listed (in descending order). Each bottle contains approximately 25 day's supply for an average adult.

The Red Earth Herbal Drops are very gentle on the body physically. This is the result of their synergistic blending process. Our entire product line works well with other liquid extracts and health products. Using these remedies with some pharmaceuticals, however, is not recommended unless under the direction of a health professional. Our descriptions are meant as an aid in choosing the correct nutrient herbal formula and is in no way meant to represent a diagnoses or prescription on our part.
